

Qualitative Research/MMC 6936/Fall 2014

Class Hours: T 12:50-3:50

Dr. Lisa Duke Cornell

lduke@jou.ufl.edu

2074 Weimer Hall

Office Hours: WR 6-8 or by appt.

392-0447

Please bring this syllabus to class with you each week in order to note changes.

Accommodations for students with disabilities. Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student, who must then give it to me when requesting accommodation.

Required Texts:

Creswell, J. W. (latest). *Qualitative Inquiry and Research Design*. Thousand Oaks, CA: Sage.

Maxwell, J. A. (2013). *Qualitative Research Design: An Interactive Approach*. Thousand Oaks, CA: Sage.

Subscribe: QUALRS-L. LISTSERV of qualitative researchers. Join the list and read about issues that are pertinent to scholars using qualitative methods. You may also decide to pose a question to the list once the semester gets underway. To subscribe, send this message to listserv@listserv.uga.edu: subscribe QUALRS-L (yourname) or visit <http://listserv.uga.edu/archives/qualrs-l.html>. For help contact Judith Preissle, jude@uga.edu

E-mail: Please check and make sure you have received an e-mail from me after the second class. Subject line: QUAL CLASS. If it is not received, the registrar has an old contact listed under your name. Please update if necessary. Check your account every day for any class changes or news.

Course Description: This class was designed to develop qualitative research skills informed by critical theory and other theories frequently used in qualitative inquiry. The focus of the class will be on major concepts, issues, theoretical bases, and methods. Participants will read major texts and current articles and discuss problems frequently encountered fieldwork, including ethical and practical problems.

The format of the class is lecture/discussion. This type of class only works well when participants spend the time necessary to read carefully and thoughtfully the readings for the week. **If you are unwilling or unable to read and discuss graduate level articles, this is not the class for you.** You are expected to contribute substantive insights to *every* class discussion. There is a grade reduction for failure to participate.

You will not be “warned” or “reminded” to participate. As graduate students, it is your job to be prepared and to practice verbalizing new concepts.

If the class is moving too fast or the presenter/teacher is using language that is unfamiliar, please feel free to raise your hand and ask for clarification. Chances are, if you are confused, others are, too!

For my part, I will try to gear readings to your interests and augment exemplar articles with foundational readings that give you the basic knowledge needed to read your homework critically. Because this is a small graduate seminar, it is expected that you will attend every class.

COURSE OBJECTIVES:

Class participants will...

1. Explore and interrogate their presuppositions about research processes.
2. Identify the kinds of problems and questions best addressed by qualitative research. By the end of this class, you will be able to specify the goals of qualitative research, the nature of the explanations generated by qualitative research and the limitations of those explanations.
3. Examine the theoretical underpinnings of qualitative and critical approaches and be able to converse fluently about the uses of these approaches.
4. Investigate strategies for designing qualitative inquiries, with attention to the values and assumptions underlying various traditions of qualitative research.
5. Evaluate qualitative research and be able to specify the criteria for quality work.

GRADING:

Any late assignment or unexcused absences will result in a deduction from your final grade for this class; amount to be determined at the discretion of the professor.

Class participation (30%): You are expected to make significant contributions to every class discussion. Because there are no exams in this course, your ability to discuss the reading is an important part of how you are evaluated for the course.

Class reading is material with which you should find it easy to engage—it speaks to human concerns, interpretations and values. I encourage you bring your unique perspective to each discussion. That can only happen, though, if you read and think and observe before each meeting.

Every Sunday, by 3 p.m., you should send me one paragraph email in which you reflect on readings for the following Tuesday -- were they similar or different? What comment would the authors have on

the others' works? What do they add to class understanding? How did the work change or add to your understanding? What don't you understand?

In addition, send one thought-provoking question or observation about facilitated reading(s) to my e-mail address and the address of the reading's facilitator. These questions/observations should be interesting enough to spark classroom conversation. The e-mails needn't be long--just insightful, compelling or otherwise provocative. You will be excused for one failure to supply your reflection and question; after that, you will lose 5% of your final grade for each missing/late exercise.

Bring hard copies of articles to class, annotated with your comments and observations.
Bring your book on days when the book is being discussed.

If you come into class after class has begun, you are tardy. Two tardies=one absence. After two absences of any kind, you will lose points from your final grade, at my discretion. You still need to do the reading and send reflection/questions for all readings, regardless of whether you attended the class.

A word about laptops: Your classmates and professors deserve your full attention for the time you are with them. E-mail and web surf before or after class – not while it is in session. Do not read articles in class on your computer. Bring hard copies.

Article critique (10%): Critique an article that employs a qualitative approach from a peer-reviewed journal in your field. If you need more info on how to find an article to review: Go to uflib.ufl.edu and do a "One Search" for keywords: qualitative + words of your choice. There will be a check box to limit your search to "peer reviewed journals."

Do not "lift" language from the article -- paraphrase. Turn in a copy of the original article with your critique. Your critique should be about a page long. Address the following:

- Focus of inquiry
- Theoretical/conceptual framework
- Data collection methods and participant selection methods
- Data analysis methods
- Findings/conclusions
- Personal reactions/critique

Interview/analyze/transcribe (40%):

Interview guide for in-class critique; interview project due last day of class.

Conduct an in-depth interview (**at least one hour long**) with someone *you do not know*. If your interview turns out to be less than an hour long, you must redo it. Otherwise, you will not have enough data to analyze.

You must interview face-to-face, in person. This is NOT an FYI interview--you will be asking your participant about their lived experience of a topic/question appropriate to

qualitative analysis. For this assignment, you will create an interview guide; conduct, record and transcribe the interview; make a preliminary analysis of categories; summarize the findings; and write your reactions to the process. The objective is to develop abstract categories of analysis rather than counts of words and phrases. All themes will be supported by illustrative quotes pulled from your transcript.

For those who need more guidance, I have added a “for instance” length after each section. The length guidelines are tentative because there is no page minimum/maximum for this assignment. You are not graded on quantity. Rather, I am looking for a credible, thoughtful account of your interview.

Include:

- a reflection on the significance of your research question (2 paragraphs?)
- a description of your interview participant and the interview setting (1 or 2 paragraphs?)
- the interview guide/protocol (1 page?)
- interview transcript marked up with notes from analysis (whatever it takes)
- a discussion of the findings and themes, with supporting quotes. (1 page or more?). Not in vivo; looking for abstraction.
- your reflections on the experience. How well did the interview progress? What difficulties did you encounter? How would you change the process for next time? What did you learn about interviewing? about yourself? about your comfort level with this method? (1 page or more?)

Please use as many words as necessary to address the assignment. Some of you may need more; some may need fewer. IRB approval is not required for this assignment because the results are for class only, not publication.

Discussion leader (20%): You will lead discussion for one or two classes (depending on enrollment) of your choice during the semester. Come to that class with a list of issues/questions that you will use to facilitate discussion among your classmates. Briefly summarize the article – then ask provocative questions or provide unexpected insights that will improve our understanding of the primary issues. Augment your discussion with visual material, exercises, etc. Google “leading class discussion” for pointers on how to keep the conversation going.

LIBRARY RESOURCES

Library Homepage <http://www.uflib.ufl.edu/> (all library services and collections)
Course Reserves <https://ares.uflib.ufl.edu/> (hard copy and/or elec. reserves)

Course Evaluation:

“Students are expected to provide feedback on the quality of instruction in this course based on 10 criteria. These evaluations are conducted online at <https://evaluations.ufl.edu>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at <https://evaluations.ufl.edu/results>. “

Tentative Schedule (subject to change with adequate notice to participants)

All articles available in Course Reserves under “Duke” at www.uflib.ufl.edu.

Articles without underlines are not research articles, per se, but are instructive on certain methods or approaches; articles with underlines are examples of applying methods and approaches.
