Course Description:

This is an age of ubiquitous communications flow and hyper transparency. The world is simply more connected than ever before: more people have mobile phones globally than have access to clean sanitation. By virtue of this rapid and incessant transfer of information, where media and conventional news sources are rapidly being displaced by self-published stories and opinions, we are more visible and publicly accountable than ever.

This has meant that the 21st Century has been a period of intense personalization and humanization. Everything we say and do is dependent on the flow of information, whoever generates it and whatever its sources. Our ever-expanding technology has made it possible to reach out and touch more people than ever before. It also requires us to stop and think about how we break through information “clutter” to affect all of those with whom we come into contact.

Storytelling is an essential part of strategic communication, and digital technology and social media have expanded the power of “the story” in helping organizations persuade and influence key audiences. This course will instruct you how to harness the power of effective storytelling and apply storytelling techniques across multiple channels. It will review and examine the oral tradition, historical and cultural significance, and evolution of storytelling as well as the importance and relevance of storytelling in communication. You will learn and apply strategies and tools for creating effective print, digital and visual stories. We will explore best practical

applications for implementing and disseminating stories across a variety of media to tap into and leverage the current and exciting communication landscape.

The course will cover how the battle for attention today is won with a compelling narrative or story told via the most appropriate media vehicles on a continuous basis. And, it will provide instruction and insights as to how organizations and brands are now required to become trans-media storytellers, where compelling and emotive stories are created to influence key audiences. The best stories communicate a brand, a point of view or an organization's key message in a meaningful and engaging way to effectively connect with, persuade and inform key audiences.

Course Objectives/Goals:

At the end of this course, you will be able to:

- Describe the tradition and evolution of storytelling and its role in the contemporary media environment as a critical tool for reaching audiences and telling a brand or organization's story.
- Demonstrate effective use of print, digital and visual storytelling tools using multiple communication vehicles across many channels – traditional media, digital media, and social media – to persuade and influence.
- Access source material and apply research for effective and compelling stories.
- Identify story ideas (“what's the angle?”) and the best media formats to convey them.
- Utilize effective storytelling tools in pitching ideas to journalists and editors.
- Craft winning hooks or openings for stories to capture the attention of targeted audiences.
- Apply covered storytelling techniques to public relations formats such as public relations campaigns, press releases, backgrounders, position papers, opinion pieces, advocacy campaigns and blogs.

Course Format:

For this course, there are 12 weeks or modules. There will be five writing/visual storytelling assignments, weekly discussions, and six quizzes.

The course also includes a final project multimedia marketing kit, where you will combine key formats and elements from the writing assignments, accompanied by an attention-getting pitch letter and incorporating appropriate storytelling techniques.

All lectures, assignments, discussion items, readings, videos, samples and other instructions are on the course website in Canvas .

University Policy on Academic Misconduct:

Academic honesty and integrity are fundamental values of the University community. Students should be sure that they understand the UF Student Honor Code at <http://www.dso.ufl.edu/students.php>

The University of Florida Honor Code was voted on and passed by the Student Body in the Fall 1995 semester. The Honor Code reads as follows:

Preamble: In adopting this Honor Code, the students of the University of Florida recognize that academic honesty and integrity are fundamental values of the University community. Students who enroll at the University commit to holding themselves and their peers to the high standard of honor required by the Honor Code. Any individual who becomes aware of a violation of the Honor Code is bound by honor to take corrective action. A student-run Honor Court and faculty support are crucial to the success of the Honor Code. The quality of a University of Florida education is dependent upon the community acceptance and enforcement of the Honor Code.

The Honor Code: “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.”

On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied:

"On my honor, I have neither given nor received unauthorized aid in doing this assignment."

For more information about academic honesty, contact Student Judicial Affairs, P202 Peabody Hall, 352-392-1261.

ACADEMIC HONESTY

All graduate students in the College of Journalism and Communications are expected to conduct themselves with the highest degree of integrity. It is the

students' responsibility to ensure that they know and understand the requirements of every assignment. At a minimum, this includes avoiding the following:

Plagiarism: Plagiarism occurs when an individual presents the ideas or expressions of another as his or her own. Students must always credit others' ideas with accurate citations and must use quotation marks and citations when presenting the words of others. A thorough understanding of plagiarism is a precondition for admittance to graduate studies in the college.

Cheating: Cheating occurs when a student circumvents or ignores the rules that govern an academic assignment such as an exam or class paper. It can include using notes, in physical or electronic form, in an exam, submitting the work of another as one's own, or reusing a paper a student has composed for one class in another class. If a student is not sure about the rules that govern an assignment, it is the student's responsibility to ask for clarification from his instructor.

Misrepresenting Research Data: The integrity of data in mass communication research is a paramount issue for advancing knowledge and the credibility of our professions. For this reason any intentional misrepresentation of data, or misrepresentation of the conditions or circumstances of data collection, is considered a violation of academic integrity. Misrepresenting data is a clear violation of the rules and requirements of academic integrity and honesty.

Any violation of the above stated conditions is grounds for immediate dismissal from the program and will result in revocation of the degree if the degree previously has been awarded.

Students are expected to adhere to the University of Florida Code of Conduct <https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code>

If you have additional questions, please refer to the Online Graduate Program Student Handbook you received when you were admitted into the Program.
