Course Description:

This course is designed to give you the basics of media strategy and analysis. Whether you're destined to be a great Creative Director or you will create the next big media startup, you will gain valuable insights into how to craft an engaging communications plan.

Media planning as a profession is an exciting one as you sit on the cutting edge of social, cultural, and consumer trends. Media is also fun as your clients are well versed in their own media consumption habits and are very engaged in the expertise that you bring to the table. But most of all, media is tremendously challenging as everyone thinks they "know" and it's constantly changing. Media planning is no longer about figuring out how to place the right message at the right time to the right consumer. Media, or Communications Planning, as it is increasingly known, is about creating a dialogue; having a conversation with your consumer.

Believe it or not you never see an ad by accident. This course will take you behind the scenes of how and why to place your message in the various media in order to create the most effective, engaging communications campaigns. We will explore how and why the definition of media is changing, learn how to understand the changes and gain valuable tools to get behind the numbers and understand the why behind the what.

Recommended Textbook:

This course uses Media Planning Essentials, a digital textbook that can be accessed at <http://library.stukent.com>. The chapters will be accompanied by quizzes that will test your understanding.

Learning Outcomes:

1. Make sense of the evolution of the new digital landscape and its impact on the new consumer purchase decision journey along with an understanding of how communications planning differs from the traditional view of *media* planning.
2. Apply media theory to the quantification of audiences both through the analysis of traditional reach, frequency and Gross Rating Points as well as understand how to create meaningful audience definitions to inform programmatic buying tools (DSPs, SSPs and DMPs).

3. Identify the various media measurement tools and select the appropriate tool to target audience analysis including MRI, Simmons, Comscore and Nielsen Cross Platform measurement.
4. Explain how the various media touchpoints are bought and sold in both the traditional and digital media landscape.
5. Create effective media strategies to efficiently reach the target audience. These strategies are developed by incorporating media theory basics, campaign strategy mandates and applying assessment tools such as CPM, CPC, CPA and/or CPE**.
6. Apply the above to the development of effective integrated paid, owned and earned communications plans that truly enable two-way dialogues between consumers and brands.

Resources and course-related materials are available on Canvas.

Grading:

Quizzes (20 points)	20%
Midterm Exam (20 points)	20%
Final Exam (15 points)	15%
Assignments (15 points)	15%
Final Project (25 points)	25%

Honesty policy:

Academic dishonesty is an important issue of concern at the University of Florida. Students who violate University rules on scholastic integrity are subject to disciplinary penalties, including the possibility of failure in the course and dismissal from the University. Since dishonesty harms the individual, other students, and the integrity of the University, policies on scholastic dishonesty will be strictly enforced. On all work submitted for credit by students at the University of Florida, the following pledge is implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.”

For the ADV 4300 course, the violation of academic honest include:

Collaboration on exams.

Using someone’s idea and materials as your own.

Using cellphone to calculate media math in the exam
