MMC 6455: Mass Communication Statistics

Thursdays 11:45am-2:45pm, Weimer 2056

PROFESSOR
Frank Waddell, Ph.D.
frank.waddell@ufl.edu
352-294-1627

OFFICE HOURS
3067 Weimer Hall
Tue, 830am-930am; Thu, 10:30am-11:30am
Also available by appointment.

REQUIRED RESOURCES/READINGS
Access to latest version of IBM SPSS statistical package
All readings will be posted to Canvas or available via UF library access

COURSE DESCRIPTION
Mass communication statistics (MMC 6455) provides an introduction to the fundamentals of descriptive and inferential statistics commonly used in the field of communication science. Topics to be covered include central tendency/dispersion, index reliability, factor analysis, chi-square, t-test, ANOVA, regression, and path analysis, among others.

COURSE OBJECTIVES
Course objectives include (1) the ability to conduct statistical analyses, (2) the ability to interpret statistical output, and (3) familiarity with key terminology from the social sciences.

GRADING
Exam 1: 25%
Exam 2: 25%
Exam 3: 25%
Exam 4: 25%

Grading scale: A, 100-93; A-, 92-90; B+, 89-87; B, 86-84; B-, 83-80; C+, 79-77; C, 76-74; C-, 73-70; D+, 69-67; D, 66-64; D-, 63-60; E, 59 and below
ASSIGNMENTS

**Exams:** Four exams will be conducted, each worth 25% of your final grade. Exams will be take-home and open-note. Each exam will be short answer and require analysis of data using the IBM SPSS statistical package. No collaboration with others is allowed. Exams will not be cumulative, but do assume incremental knowledge of statistical concepts introduced throughout the course. Optional practice problems will be posted weekly to assist with exam preparation; problems can be submitted via email for feedback.

**LATE WORK POLICY**

One letter grade (-10 points) will be deducted per day for work submitted past the assignment’s deadline. If an exam is missed, official documentation must be provided for the absence, with a makeup test scheduled within one week of the original examination. If students anticipate that they will be unable to meet a deadline due to university documented issues (e.g., health condition, death in family), please contact me as soon as possible to arrange an extension. In general, I am quite willing to work with students when issues arise that prevent you from submitting work on time.

**HONOR CODE POLICY**

This class strictly adheres to the UF honor code. Any prohibited behavior such as plagiarism, data fabrication, or cheating will result in a failing grade for the assignment in question and referral to the honor court, who may administer additional penalties such as a failing grade for the course or dismissal from the college. More information about the university honor code is available online at the following link: https://www.dso.ufl.edu/scer/process/student-conduct-honor-code/

**STUDENTS REQUIRING ACCOMODATIONS**

Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.
COUNSELING AND WELLNESS

Contact information for the Counseling and Wellness Center:
http://www.counseling.ufl.edu/cwc/Default.aspx, 392-1575; and the University Police
Department: 392-1111 or 9-1-1 for emergencies.

COURSE EVALUATION

Students are expected to provide feedback on the quality of instruction in this course by
completing online evaluations at https://evaluations.ufl.edu. Evaluations are typically open
during the last two or three weeks of the semester, but students will be given specific times when
they are open. Summary results of these assessments are available to students at
https://evaluations.ufl.edu/results/.

Schedule

January 9th: Class Introduction; Empirical Methods Primer
January 16th: Basics of Descriptive Statistics; Introduction to SPSS
January 23rd: Reliability/Validity; Index Formation
January 30th: Exam #1
February 6th: Basics of Inferential Statistics; t-test
February 13th: ANOVA, Part One
February 20th: ANOVA, Part Two
February 27th: Exam #2
March 5th: Spring Break; No class
March 12th: Regression, Part One
March 19th: Regression, Part Two
March 26th: Exam #3
April 2nd: Basics of Mediation Analysis
April 9th: Chi-square; Factor Analysis
April 16th: Exam #4
April 23rd: Reading Day; No Class
April 30th: Grades Posted
