**COURSE OVERVIEW**

At its core, Public Relations (PR) is about cultivating, influencing, engaging, and maintaining a relationship with key stakeholders to contribute to the way an organization is perceived. Traditionally, PR/Communications built the common playground for the whole organization to operate and thrive. In recent years and months, PR/Communications professionals and leaders are being increasingly invited to a seat at the business table to influence and shape business decisions. PR Industry recognizes now that there is no future of PR/Communications without a data-driven culture.

In this one-credit course, you will learn about data-driven ways to achieve PR excellence – the value of a data-driven approach and mindset for PR; intro to PR data and tech landscape; simple steps for analyzing reputation/earned media data and deriving actionable PR insights; and developing a data-driven PR strategy and presenting insights and recommendations in an impactful way.

This course leans towards the business and strategic needs for data-driven PR rather than a deep dive into tools and technology. Tools will be used in the class (as needed) to aid the data-driven approaches and processes discussed in the class.

**COURSE OBJECTIVES**

This course will help students gain an understanding and appreciation of data-driven strategies for PR and the ability to design and direct data-driven ways of solving problems.

- Understanding how data-driven approaches apply to PR and its outcomes
- Gain awareness of PR data and technology landscape - current & trends
- Process steps and techniques to use data and derive insights for the organization
- With the aid of live data! from an earned media monitoring tool, understand PR outcomes, actions and their impacts – from a data lens.

- Run sample analysis to test the process and defined objectives (using the live tool)
- Understand and use data storytelling practices and techniques
- Develop and apply strategic thinking and problem-solving skills through assignments that mimic industry work with clients and peers.
