ADV 4930/MMC 6936 Social Media Analytics & Strategy Spring 2024

Meeting Time: Tuesdays 3:00–4:55 pm and Thursdays 4:05 – 4:55 pm Meeting Location: Zoom

Instructor:

Dr. Yang Feng

E-mail: y.feng@ufl.edu

Office Hours: Tuesdays/Thursdays 10:40 – 11:40 am (Zoom: https://ufl.zoom.us/j/2878807530)

Prerequisites:

Undergraduate students: ADV 3008 and MAR 3023 with minimum grades of C and Advertising major of junior standing or higher.

Graduate students: Consent of instructor or graduate adviser.

No previous programming experience required.

Course Description

This course caters to students intrigued by social media campaigns, including influencer marketing and societal initiatives, irrespective of their programming background. It melds the theoretical underpinnings of social media analytics with hands-on experience in Python and supplementary software tools, presented through lectures, workshops, and interactive discussions.

The semester begins with an immersion into Python's core concepts and essential packages tailored for social media analysis. As the course progresses, we shift our focus to real-world social media campaign studies. Students will be equipped to harness Python for comprehensive brand solutions within the algorithmic social media landscape, encompassing data acquisition, analysis, and visualization.

What you need to bring to class

Your laptop (either PC or MAC) and earphone

Software and tools we need to use in class

Google Colab, Microsoft Excel, Google Chrome, Gephi

Student Learning Outcomes (SLO): What You'll Learn along the Way

- SLO #1: Describe the role of Python and other software in social media analytics.
- SLO #2: Explain the role of the algorithmic social media environment in shaping advertising effectiveness.
- SLO #3: Perform social media advertising research using Python and other software.
- SLO #4: Evaluate the performances of both dictionary-based and machine learning-based sentiment analysis techniques.
- SLO #5: Interpret research results and present them in a story-telling format.

Course Materials

Course materials are available on Canvas.

Textbook and Readings

There is no required textbook.

Grading Policy: How I'll Determine Your Grade

The overall grading system in this course is:

A = 93-100	C = 73-76
A = 90-92	C = 70-72
B+ = 87-89	D + = 67-69
B = 83-86	D = 63-66
B-=80-82	D - = 60 - 62
C+ = 77-79	F = 59 and below

More information on UF grading policy may be found at:

http://gradcatalog.ufl.edu/content.php?catoid=10&navoid=2020#grades

https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx

Course Assessment

Weekly reflection posts	20 points
Class discussion	10 points
Project 1 (Team-based)	30 points
Project 2 (Team-based)	40 points

Total 100 points

General Class Policies

Cellphone: Silence your phone or turn it to airplane mode prior to entering the class.

Late Assignments –Unexcused late class assignments or projects will be penalized 10% of the assigned marks each day. However, a student who presents the instructor with a <u>documented</u> (i.e., <u>written</u> and <u>verifiable</u>, not oral) reason for an absence normally within a week will be given an opportunity to make up the work missed <u>if</u> this is feasible.

Incompletes – No incomplete grades will be issued except in extraordinary and well-documented circumstances.

Attendance Policy, Class Expectations, and Make-Up Policy

Excused absences must be consistent with university policies in the <u>Undergraduate Catalog</u> and <u>Graduate Catalog</u> and require appropriate documentation.

Formal Course Assessment: How You'll Know You're Learning

1. Weekly Reflection Posts: (20 points)

Given the workshop format of this course, your participation is critical. You should finish all your readings prior to class and be prepared to talk and contribute to class discussions. Also, each week on Tuesday (by 2 pm), you are required to post what you have read in that week and your opinions about the reading material on Canvas Discussion Forum (except for Week 1, Week 7, Week 10, Week 11, Week 14, Week 15, and Week 16).

Your posts will be evaluated on a 10-point scale (0 for poor, 10 for excellent), based on the following:

- Student ability to summarize the key ideas from the reading of the week.
- Student ability to raise questions on the reading of the week.

***Note: Your weekly reflection post should contain at least 150 words (if you are an undergraduate student) or at least 300 words (if you are a graduate student).

2. Class Discussion: (10 points)

Given the workshop format of this course, your participation in discussion is critical. You are encouraged to finish all the in-class exercises during class time and be prepared to talk and contribute to class discussions.

Assignment Grading:

Your participation in class discussions will be evaluated by the instructor during lecture weeks on a 10-point scale, with 0 indicating no participation and 10 representing the most active participation. This evaluation will be based on three main criteria:

- 1. Active participation in reading/exercise discussions as well as discussions on course topics.
- 2. Responding to questions posed by the instructor or classmates.
- 3. Raising questions about the readings and course topics during class.

3. Projects (70 points)

There will be two team-based projects throughout the semester. Therefore, it is important for students to come to class on a regular basis.

Project 1: group presentation on sentiment analysis (due date: March 26) (30 points)

Project 2: group presentation on media exposure environment (due date: **April 23**) (40 points)

Grading will be based on:

- 1) Team ability to run Python coding and/or other software to analyze data.
- 2) Team ability to present sufficient research results to support claims.
- 3) Team ability to organize information in an efficient and a story-telling way.
- 4) Team ability to generate creative visuals.
- 5) Team ability to deliver effective oral presentation.

***Note: If you are a graduate student, please add a discussion section in your project to discuss how the results shed light on any advertising/mass communication theory.

4. Peer Evaluation

You will be evaluated **two times** during the semester by your team members. This is not a popularity rating but an objective evaluation of the commitment and quality of your efforts and contributions as seen by your team members. An average for both evaluations over the course of the semester will be computed for each team member. The evaluation form will be provided at the appropriate time. All evaluations are strictly confidential.

Your average team evaluation at the end of the semester will be used to adjust the amount of team points that **you** will receive as follows:

Your average evaluation for semester Your percent of team points received

90% or above	Full points (100%)
85% to 89%	90%
80% to 84%	70%
70% to 79%	50%
69% or below	10%

For instance, let's assume your team performs exceptionally well and earns the maximum number of team points for the semester, which is 60 points. However, if your team feels that you didn't contribute significantly and consequently rates you an average evaluation of 81%, you would receive only 42 points (60 * 70%) for all team-based assessments. Conversely, a team member with an average evaluation of 92% would secure the full 60 points for all team-based assessments. This example illustrates how group evaluations can lead to significantly different grades for members within the same team.

Participation in the evaluation process is not optional. If you fail to turn in an evaluation for any person on your team at the time that evaluation is due, you will receive zero points for that evaluation period.

Course Topic & Schedule: What You'll Be Doing

The lecture topics and relevant readings for each class are listed in the table below. Students are expected to have completed the assigned readings for the day BEFORE coming to class. **Topics and schedule are subject to change**.

University Honesty Policy

UF students are bound by The Honor Pledge which states, "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment." The Honor Code (https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

Software Use

All faculty, staff, and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.

Student Privacy

There are federal laws protecting your privacy with regards to grades earned in courses and on individual assignments. For more information, please see:

http://registrar.ufl.edu/catalog0910/policies/regulationferpa.html

Courser Evaluation

Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at https://gatorevals.aa.ufl.edu/students/. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their

Canvas course menu under GatorEvals, or via https://ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students at https://gatorevals.aa.ufl.edu/public-results/.

Accommodation

Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the disability Resource Center. Click here to get started with the Disability Resource Center. It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester.

Campus Resources:

Health and Wellness
