Course Info

**When:** Monday 12:50am-3:50pm

**Where:** Weimer Hall 1074

**Instructor:** Dr. Yu-Hao Lee

**E-mail:** leeyuhao@jou.ufl.edu

**Phone:** (352)392-3951

**Office hours:** by appointment

**Office:** 3051 Weimer Hall

The best way to reach me is through email. I check my email very frequently. If you send me an email, expect to receive a response within 48 hours.

Course Objectives

How do people with different motivations approach media? How do people’s emotions affect the way they use media? How do people process mediated messages? And how does media affect users? Media psychology examines how we interact with media on the psychological level. Instead of focusing only on the user or the media, media psychology examines media use and effects as an interaction between media, content message, and users. This course is structured into three general sections: 1) Motivation and adoption of media. 2) Media processing theories. And 3) Media effects. It is set up this way to help you gain a general overview of the theories and methods in the field. As an advanced course, you will go through the complete process of designing and conducting a media psychology study. Students should have basic knowledge of (or strong motivations to learn) quantitative research methods to succeed in this course.

Readings

There are no required textbooks for this class, all the readings will be posted on the Canvas course site ([https://lss.at.ufl.edu](https://lss.at.ufl.edu)) select “e-Learning in Canvas,” and log in using your Gatorlink ID

Requirements

**Moderate discussions:** You will work in groups to present the key concepts of each reading, background/theory, research questions/hypotheses, methods, results, conclusions.
IMPORTANT: You should assume that the class has already read the readings, your role is not to give a detailed presentation of the readings, but to come up with thought-provoking question that helps the class compare and integrate the theories and applications. You can send me the discussion questions on the weekend before class if you want me to look over them.

Based on your understanding of the readings, find media examples to facilitate discussion. Share the example with the class and discuss how it relates to the weekly topics. You may prepare slides or handouts to stimulate class discussion but do not do excessive stylistic work on your slides.

Mini-prospectus (Due September 13): You will identify a specific research question, explain why it is of interest to you, and review at least two theoretical approaches that have been applied to examine the research question or phenomenon. Explain why the research question is important (i.e. the ‘so what?’ question), and why our current understanding is insufficient. The purpose of the mini prospectus is help you identify key research questions or constructs that can be developed into a research project.

The second paper (Due October 18): You will focus on the specific construct/phenomenon that was presented and revised in the mini-prospectus. Provide a literature review of the issue by focusing on various theoretical approaches that have been applied to the phenomenon. The paper may discuss this in an evolutionary manner, i.e., detailing how theories have developed and replaced one another. Identify competing theories and perspectives and how they have been applied to related phenomena, highlight the disagreements that need to be resolved conceptually and empirically. The literature review should ‘not’ be a reading list of existing literature, compare and summarize existing studies, identify what the critical arguments and differential explanations are that remain contested or conflicted which need resolution in order for a more sophisticated understanding of the phenomenon to be reached. The second paper should conclude with a proposed study design including your measurement scales. The purpose of this paper is to demonstrate that you understand how to formally apply theory to problems and deduce testable research questions that can be operationalized.

The final research paper (Due December 11): As an advanced course. The final paper should be a complete research paper that can be submitted to a conference or journal for publication. You will extend the second paper by revising the method section and reporting your study results. Your final paper should be 20-25 pages in length not including the references (APA 6th edition) including introduction, literature review, research question/hypotheses, method, results and discussion.

Working in groups: You may work in pairs of groups for a more rigorous project with prior approval.

Final presentation: at the end of the semester, you will have 20 minutes to present your paper (not including Q&A) in which we will discuss your topic of research and provide feedback. Prepare your presentation as you will in an academic conference.

Class Policy

**Attendance:** Seriously, graduate students do not skip classes. The class will start promptly, if you come in late or must leave early, please do so quietly without disturbing others.

**Electronic devices:** You are allowed to bring laptops or tablets for note-taking. But uses of other electronic devices are strictly prohibited during class, ESPECIALLY cellphones. Please turn your phone off or to silent mode during class and keep it tucked away.

**Honor Code:** As a student at this university, you have accepted a commitment to the Honor Code, and the principles of academic integrity, personal honesty, and responsible citizenship on which it was founded. As an instructor at this university, I am also charged with its enforcement and take that responsibility very seriously.

You can find the complete honor code via this link: [https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/](https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/)

Among the activities that could result in Honor Code violations are plagiarism, cheating, misrepresenting sources, the unauthorized use of others’ work, etc.

Examples of academic dishonesty include, but are not limited to:

- Using phrases or quotes from another source without proper attribution or quotation marks. This includes paraphrasing without proper attribution
- Pass off other people’s ideas as your own
- Turning in the same assignment or paper from your other courses
- Fabrication of literature or data
- For this class, five or more words (verbatim) from a source without proper attribution

Ask the instructor if you are uncertain about your Honor Code responsibilities within this course.

**Special Needs:** According to University policy, students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide
appropriate documentation to you and you should provide this documentation to me when requesting specific accommodation. It is your responsibility to initiate this conversation early in the semester and you should plan to meet with me during office hours to discuss this.
